Summary

B.Tech CSE Student with strong knowledge of HTML, CSS, JavaScript, and responsive web design. Experienced in building interactive web applications such as To-Do List and E-commerce websites. Also proficient in Python with basic backend experience using Django, enabling better integration between frontend and backend systems. Passionate about creating user-friendly UI, improving UX, and continuously learning modern frontend technologies like React. Seeking a frontend developer internship to apply skills in real-world projects.

Skills

Frontend :

HTML | CSS | JavaScript | Responsive Web Design | DOM Manipulation

Backend:

Python | Django | Node.js | Express.js

Tools:

Visual Studio Code | Git & GitHub | MS Excel

Projects

TODO LIST

- Built an interactive to-do list application to manage daily tasks and routines
- Implemented add, edit, delete, and task completion features using JavaScript
- Used browser local storage to persist tasks across sessions
- Improved JavaScript logic, DOM manipulation, and responsive UI design

E-COMMERCE WEBSITE | Django, HTML, CSS, JavaScript

- Developed a functional e-commerce website using Django and Python with a responsive frontend
- Implemented user authentication, product listing, product details, and shopping cart features
- Integrated Django models, views, and templates to connect backend logic with frontend UI
- Designed reusable templates for consistent and user-friendly interface
- Gained hands-on experience in full-stack web development and frontend-backend integration

Certification

- Complete Python with DSA Bootcamp + Leetcode Exercises – Udemy (2025)
- Data Analytics Job Simulation – Deloitte (2025)
- Python Programming Course – SWAYAM (2024)
